Main Contribution of this paper: Write in 1 short sentence like we proposed or implemented or studied or reviewed ...

Abstract: Write within 200 words. Times New Roman, Font size: 10.

Introduction: The following sections are example that one can follow. If you consider Springer Book chapter, you can submit to Springer's template (MS Word / LaTeX) for book chapter from <https://www.springer.com/gp/authors-editors/book-authors-editors/your-publication-journey/manuscript-preparation>

You can write that fits the best. Page limit in single column: 4~30 pages. Note that we do not take any copyright and we will not publish this paper (only the Abstract will be added in the proceedings). You will only present the work during the workshop and do brainstorming session to improve further. Therefore, you can present your published work with proper reference that it has been published in [1]. Note that no plagiarism from another sources. Survey papers are welcome. Work-in-progress papers can be submitted as well. Selected papers will be considered for **Springer book or IJCVSP journal** during the 1st review or after the presentation.

Background / Related Work: Should be based on the recent top journal and conference papers.

Methodology:

Experimental Results:

Figure 1: Show important and original images only. Do the same for Tables.

Analysis of Results:

Discussion: Need in-depth discussion with other good methods (no worry if your performances are not good) – put theoretical and experimental analysis and discussions for the future and better outcome. Only presenting your results will not improve the future ☺ (no emoji in the paper!).

Conclusion and Future Work:

Reference: as per the format of IEEE in numbers.
